When it comes time to head out on the water, you can grab your gear, hop in your boat, and quickly power out of the harbor or off the shoreline with a 150-horsepower outboard engine. These engines can fit a number of boat models, and due to design variations, they could achieve varying levels of RPM. Be sure to check that 150 horsepower is within the range of the capacity of your vehicle.

Embrace Possibility. Mercury FourStroke outboard motors are incredibly powerful and efficient, and they feature a wide range of applications. Crafted for less weight and high displacement, they generate abundant torque and immediate power. And because they don't have to work as hard as heavier engines or those with lower displacement, they make boats plane faster and accelerate better, and ...

Greenwood says that moving the outboard up one mounting hole - or 0.75 inch - will allow the motor to gain RPM at wide-open throttle because drag is reduced. "If you are 250 RPM low, say about 5700 but you want to get to 6000, raising the motor a hole might get you there, and produce about one additional mile per hour in top speed ...
