Asperger Syndrome And Alcohol Drinking

Asperger Syndrome and Alcohol exposes the unexplored problem of people with Autism Spectrum Disorders (ASDs) using alcohol as a coping mechanism to deal with everyday life. Alcohol can relieve the anxiety of social situations and make those with ASDs feel as though they can fit in. Ultimately, however, reliance on alcohol can lead the user down a path of self-destruction and exacerbate existing problems.

Asperger Syndrome and Alcohol: Drinking to Cope ...

This is one of the questions that Asperger Syndrome and Alcohol: Learning to Cope by Matthew Tinsley and Sarah Hendrickx seeks to answer. Tinsley has AS and went through a prolonged period of alcoholism, whilst Hendrickx works with adults with AS within a support project. They have come together to combine experiences.

Asperger Syndrome and Alcohol: Drinking to Cope?

Asperger's and Addiction. Some studies, such as one published in the journal Drug and Alcohol Dependence, suggest that Asperger's syndrome isn't connected to a heightened risk of addiction, as people who have this disorder don't tend to seek out unusual experiences. They seem to like things that are predictable, measurable and programmable, so they wouldn't enjoy the strange sights and sounds a bout of drug use or a bolt of alcohol could deliver.

Abstract. Background. Low prevalence of substance-use disorder has been reported in adults with autism. However, on a superficial level, adults with high-functioning autism (HFA) display a 'normal' façade when they drink alcohol, which may explain why their alcohol dependency is not better diagnosed. Case presentation.
