This is an introductory astronomy survey class that covers our understanding of the physical universe and its major constituents, including planetary systems, stars ...

The Evolving Universe | edX

While people have puzzled about their place in the universe for thousands of years, scientific cosmology dates from the 1920s, when Edwin Hubble discovered the expansion of the universe. This course explores, in a generally qualitative fashion, the evidence of the creation of the universe in the Big Bang and the evolution of the universe with time.

Astronomy 280: Evolution of the Universe

Offered by Caltech. This is an introductory astronomy survey class that covers our understanding of the physical universe and its major constituents, including planetary systems, stars, galaxies, black holes, quasars, larger structures, and the universe as a whole.
