Marketing is to find ways to grab the attention of your target audience through different touchpoints. A touchpoint is an interaction between the company and a potential customer. If a customer sees the same message multiple times on different platforms at different touchpoints, he/ she is more likely to convert into a customer.

An engineer can be a growth hacker just as much as a marketer can. What matters is their focus. Due to the startup culture, they often have to use analytical, inexpensive, creative, and innovative methods to exponentially grow their company's customer base. That's the only thing that a growth hacker does.
