Case Study Methodology 529 We established four prerequisites for inclusion as a case study: • The case was certified by the court as a class action; this would include cases certified for settlement only. • The case had been filed within the several years prior to our study.

Appendix D CASE STUDY METHODOLOGY

Abstract. The main aim of the chapter is to discuss the case study method. We shall begin by confronting its definition. It is quite a challenge, as researchers representing various paradigms embark on this type of research project. These paradigms define the way we perceive the explored reality, our chances of understanding/cognizing it, and the acceptable research methods.

Case Study | SpringerLink

A case study is a research methodology that has commonly used in social sciences. A case study is a research strategy and an empirical inquiry that investigates a phenomenon within its real-life context. Case studies are based on an in-depth investigation of a single individual, group or event to explore the causes of underlying principles.

Definition of Case Study - PressAcademia

The case study method often involves simply observing what happens to, or reconstructing 'the case history' of a single participant or group of individuals (such as a school class or a specific social group), i.e. the idiographic approach.

Case Study Method in Psychology | Simply Psychology

Basically, a case study is an in depth study of a particular situation rather than a sweeping statistical survey. It is a method used to narrow down a very broad field of research into one easily researchable topic.

Case Study Research Design - How to conduct a Case Study

In the social and life sciences, a case study is a research method involving an up-close, in-depth, and detailed examination of a particular case. For example, a case study in medicine may examine a specific patient a doctor treated, and a case study in business might study a particular firm's strategy.
