CB radio "SWR" meters (26-27 MHz) are fairly inexpensive, such as the AUSWR, however, meters to check other radio frequencies can be expensive. Make sure to purchase a "SWR" meter that will test the frequency range your radio operates in. Example: CB radios operate on 26-27 MHz while a Marine radio operates on 156-164 MHz.

How to Tune a CB Antenna | CB World

Long Range CB Antenna Types. The type of antennas with the greatest range are the stainless steel 102" whip antennas, which may not be practical for parking in garages, under trees, and so forth. The single center load antenna also has about the same transmit and receive range as the whip.. Dual fiberglass antennas, with an approximate range of 5-7 miles for four-foot length, have roughly a 25% ...
