Before we talk about the differences, we need to know a little bit about what happened in the time between the release of version 3 and the version. Between the launch of the first stable version of CodeIgniter 3 and that of CodeIgniter 4, it took almost 5 years, 1767 days to be more precise. In that time much has changed on the internet, 8 versions of PHP were launched, several other PHP frameworks appeared and those that were already on the market were being updated.
