Risk: You aren't getting what you paid for. The biggest risk of using any cosmeceutical product is the product doesn't live up to its claims. It may promise to do X, Y, and Z, but at the end of the day if the product doesn't contain the right ingredients at the right levels it won't do much to improve your

Cosmetic ingredients previously considered "inert" have potential to provide a biologic effect to skin. In a cosmeceutical formulation, the boundary between an "active" and "inert" ingredient may be obscured. For this reason, the cosmeceutical distributor must find a nonambiguous method to demonstrate the

Ingredients
normally do not have active ingredients and if they do have active ingredients they are not at the scientific proven levels or in the correct delivery system to benefit the skin.

Because consumers tend to “self-diagnose” and choose a skin care product that is easily available from a drug or department store.
