was also practiced in Oceania and Aboriginal Australia using sea shells as the cutting instrument. Circumcision in Oceania and Australia was a rite of passage into manhood as well as a test of bravery.

The Cutting Truth about Circumcision: It Was All About ...

Circumcision is the removal of the foreskin from the human penis. In the most common procedure, the foreskin is opened, adhesions are removed, and the foreskin is separated from the glans. After that, a circumcision device may be placed, and then the foreskin is cut off. Topical or locally injected anesthesia is generally used to reduce pain and physiologic stress.
