Asphalt 101: An Introduction to Hot Mix Asphalt

Design Fundamentals 101. Hot mix asphalt (HMA) consists of two basic ingredients: aggregate and asphalt binder. HMA design is the process of determining what aggregate to use, what asphalt binder to use and what the optimum combination of these two ingredients ought to be. Asphalt Cements.

HOT MIX ASPHALT - McAsphalt

Widely used for its convenience, hot mix asphalt is the most common used flexible pavement in the US. It is also known as blacktop or bitumen, and sometimes just hot mix. Hot mix pavements are classified mainly as dense-graded mixes, stone matrix mixes, and open-graded hot mix asphalt. There are also other types of asphalt but are limited to maintenance and rehabilitation works.

Three Hot Mix Asphalt Types

Hot mix asphalt is manufactured at temperatures between 270° F and 325° F. Depending on the environmental conditions and the distance from the hot mix plant to the project, hot mix asphalt can ...

Texas Asphalt Pavement Association (TXAPA)

The binder layer can be thought of as the strength of any new asphalt surface. Step 6: Install New Asphalt Surface. Once the supportive structures of a new asphalt surface are installed, the top layer of fresh asphalt is added to provide a clean, smooth ride. Surface asphalt is made up of small aggregate, sand, and oil.

The Complete 7-Step Process for Asphalt Pavement Installation

In A Century of Progress: The History of Hot Mix Asphalt, published by National Asphalt Pavement Association in 1992, author Hugh Gillespie notes that “an inscription on a brick records the paving of the Procession Street of Babylon, which led from his palace to the north wall of the city, ‘with asphalt and burned brick.’”

National Asphalt Pavement Association

Also called hot mix or hot mix asphalt, it is an aggregate of stone and sand, along with a slurry of asphalt, a tar-like material made from petroleum. The asphalt is heated to over 300 F to liquefy it. Asphalt contractors have to work with it fast before the mix solidifies. Hot mix is not driveway sealant or crack sealant.

A Guide to Asphalt Driveways - The Spruce

If the contractor does not own a plant and must purchase mix from another producer, the number of tons of mix to be purchased is usually a contract item and of predictable supply. Contractors also know the size and capacity of the transport trucks used to deliver hot mix asphalt (HMA) to the project.
