13 Amazing Pets Who Saved Their Owners

A 2013 study in Animal Cognition suggested that dogs do indeed have long-term memory, so it makes sense that they might be able to recognize their pups. But the fact is that it depends on a number of factors, like how long they've been separated. If they did remember, it might be similar to a human "meeting a person on the street and not realizing at first this was a friend from years past ...

Do Adult Dogs Still Recognize Their Mothers? | Psychology ...

Dog memory depends more on imprinting, a biochemical process stimulated by sight and smell. Imprinting is an innate behavior or response to a learned stimulus and occurs at a particular time in an animal's life known as "the sensitive time." This happens in a mother dog after giving birth and triggers her protective instinct.

Can Female Dogs Recognize Their Offspring in Later Years ...

" It's My Life " is a song written by Brill Building songwriters Roger Atkins and Carl D'Errico. The song was originally performed by English R&B band The Animals, who released it as a single in October 1965 (see 1965 in music). The song became a hit in several countries and has since been recorded by multiple artists.

It's My Life (The Animals song) - Wikipedia

A puppy is a juvenile dog. Some puppies can weigh 1–1.5 kg (1-3 lb), while larger ones can weigh up to 7–11 kg (15-23 lb). All healthy puppies grow quickly after birth. A puppy's coat color may change as the puppy grows older, as is commonly seen in breeds such as the Yorkshire Terrier.

A little artistic license makes for personality-laden pet portraits. By Vickie Nelson My two biggest passions are watercolor painting and dogs. Over the past several years, I've enjoyed combining them to depict some of my favorite canines' personalities in engaging pet portraits. I'm enchanted by the animals' sweet faces and expressive postures, and strive to create unique works that ...
