Jackdaws

The western jackdaw (*Coloeus monedula*), also known as the Eurasian jackdaw, the European jackdaw, or simply the jackdaw, is a passerine bird in the crow family. Found across Europe, western Asia and North Africa; it is mostly resident, although northern and eastern populations migrate south in the winter.

Western jackdaw - Wikipedia

Jackdaws is a grim mockery of the dedication and fierce bravery of the SOE girls. It exploits a very real and turbulent episode in European history, failing to present the complexity of the sacrifice these women were willing to make - many gave their lives.

Jackdaw definition is - a common black and gray bird (*Corvus monedula*) of Eurasia and northern Africa that is related to but smaller than the carrion crow.

Jackdaw | Definition of Jackdaw by Merriam-Webster

Our smallest crow, the jackdaw is a bird of woodland, parkland, coasts and urban areas. It nests in holes in trees, and on cliffs and buildings; sometimes it will even nest in chimneys! It eats invertebrates, fruit, seeds and carrion, and occasionally takes eggs and nestlings.

Jackdaw | The Wildlife Trusts

A team of female insurgents fight in Occupied France during World War II. Based on the novel by Ken Follet.

Jackdaws (TV Movie) - IMDb

"A very entertaining, very cinematic thriller about a ragtag, all-female band of British agents, code-named Jackdaws, sent to blow up a key telephone exchange in France on the eve of D day... adventure, romance, derring-do.... [Jackdaws] promises to be one of Follett's most popular novels ever."

Amazon.com: Jackdaws (9780451207524): Follett, Ken: Books

Jackdaws are the smallest member of the crow family (collectively known as corvids), which also includes ravens, crows, rooks, jays and magpies. Like most of their cousins, jackdaws are just as much at home in farmland and woodland, as they are in urban landscapes. The latter is thanks to their adaptability and intelligence.

7 amazing jackdaw facts - Discover Wildlife

Coloeus is a genus of bird that is sometimes treated as a subgenus of *Corvus*, including by the IUCN. It contains two relatively small species both named jackdaws. They have a blackish crown, wings and tail, the rest of the plumage being paler. The word *Coloeus* is New Latin, from the Ancient Greek for jackdaws: *koloios* (κολοιός).

Coloeus - Wikipedia

This is a small, black crow with a distinctive silvery sheen to the back of its head. The pale eyes are also noticeable.

Jackdaw Bird Facts | Corvus Monedula - The RSPB

Jackdaw, also called Daw, (species *Corvus monedula*), crowlike black bird with gray nape and pearly eyes of the family *Corvidae* (q.v.; order *Passeriformes*). Jackdaws, which are 33 cm (13 inches) long, breed in colonies in tree holes, cliffs, and tall buildings: their flocks fly in formation around the site.
