If the car won't start but the battery is good, check the timing belt. The car won't start but the battery works well while starting it just turn over and will not start but the car turns over a lot faster than normal. If the battery works fine the possible reason why the car won't start is the timing belt.

Volumes of crankcase contaminants vary greatly between vehicles and, like flow, are influenced by engine size, power, age and usage. In-vehicle testing has shown that crankcase blow-by contaminants can accumulate from a modest 8ml/1000km on a 2.2L PX Ranger performing primarily highway driving to over 30ml/1000km on a VDJ78 Landcruiser performing a lot of stop-start towing.
