All the user needs to do is install that kernel and the ocf2-tools rpm package. It is easily configured. The cluster stack configuration involves editing two files, one that holds information about the nodes in the cluster, and the other, cluster timeouts. It is very efficient. The file system consumes very little resources. It is widely used to

OCFS2 - A Cluster File System For Linux
OCFS2 is a high performance, high availability, POSIX compliant general-purpose file system for Linux. It is a versatile clustered file system that can be used with applications that are non- cluster aware and cluster aware. OCFS2 is fully integrated into the mainline Linux kernel as of 2006 and is available for most Linux distributions. In addition, OCFS2 is embedded in Oracle VM and can be used with Oracle products such as the Oracle Database and Oracle RAC solutions.
