Origins Of Design In Nature

For over two millennia, people have argued that the 'design' in nature points to a Designer. 1 In 44 BC, the Roman writer, orator and statesman, Cicero (106–43 BC), used this concept in his book De Natura Deorum (On the Nature of the Gods) 2 to challenge the evolutionary ideas of the philosophers of his day.

(PDF) On the Biological Origin of Design in Nature...

As biologists and other scientists debate about design in nature, the field for which design is the distinctive subject-matter remains largely ignored. 1 Few biologists have extensive experience designing anything intended to achieve a specified function subject to physical constraints. Consequently, arguments for or against design in nature and in particular, the design of living organisms ...

Design history thrives when it interrogates the environmental complexities of human creations, and environmental historians can learn much of human behavior from design history. The essays in *The Culture of Nature in the History of Design* draw upon design histories of landscapes, communities, buildings, and materials around the world as different cultures, economic systems, and movements of resistance moved to create the new, create anew, to transform the discarded, and to ...
