Piper Pa 22 135 Flight

Originally powered by the same 125/135 hp Lycoming as the Pacer, the Tri-Pacer is a solid 125-130 mph cruiser with the bigger engine that can fly out of a shorter field than many might believe. If the air is even remotely smooth, the Tri-Pacer can be easily trimmed for hands-off flight while you watch the scenery go by.

Tri-Pacer PA-22-135 Specifications, Cabin Dimensions ...

At this time the captain saw from the left side window the shadow of an aircraft converging with his flight path over the runway. He skidded the aircraft evasively to the right, used emergency power and called for gear up. He then saw a Piper PA-22-135 Tri-Pacer (N3334B) close ahead, above and nearly into his left propeller.

Technical Publications Notification Service | Piper Aircraft

Piper needed a stop gap airplane to fill the trainer role which they would not have until the PA-28 Cherokee 140 was introduced. What they came up with was the wonderful little PA-22-108 Colt. Piper must have done their homework as well over 2,000 Colts were manufactured in the three year production run at Lock Haven, PA.

PA-22-108 Colt - Short Wing Piper Club

The PA-20 Pacer and PA-22 Tri-Pacer are a family of four-place, strut braced, high-wing light aircraft that were built by Piper Aircraft in the post-World War II period.. The Pacer was essentially a four-place version of the two-place PA-17 Vagabond light aircraft. It features a steel tube fuselage and an aluminum frame wing, covered with fabric, much like Piper's most famous aircraft, the Cub ...

1952 PIPER PA-20-135 Pacer - Specifications, Performance ...

I used to own a 1950 PA-20 Piper Pacer. It had a Lycoming O-290 135 HP engine. It had 4 seats but it was basically a 2 seater, maybe 3 if the people weren't 200+ pounds. I know the accident plane had a Lyc. O-320 150 horse engine but with 4 people aboard its climb performance would be pitiful. I hate to read about such sad events. Reply Delete
