PASS PLANT UNIT STUDY GUIDES - SOUTH CAROLINA 6TH GRADE ...
Plants use a gas in the air called carbon dioxide and release oxygen. The third thing plants need for photosynthesis is water. Plants get water from the soil through the roots. The last thing that plants need for photosynthesis is sunlight. Sunlight is the energy for the plants that helps it change carbon dioxide into food for the plant.

Plants Study Guide (Answer Key)
Incorporate botany in your classroom with these lessons and printables on trees, flowers, ferns, molds, and mosses. There are science activities on plant cells, photosynthesis, pollination, and much more! From gardening to chromatography, you'll find fun ideas for Earth Day and Arbor Day.

Plant Lessons, Printables, & Resources (K-12) - TeacherVision
The thematic unit on plants lends itself to a variety of writing styles. Begin with short paragraphs to summarize the introductory discussions. Continue working with nonfiction writing by having students write individual lab reports from the results of their group experiments. Descriptive writing is also a great match for a plant study.

Life Processes - Plants SOL 4.4 - Mrs. Murray's Fourth ...
Inside plant cells, you can see a chloroplast (green ovals) that take energy from the sun and convert it into sugar, which is then used as food by plant cells. In plant, fungi, and bacteria cells you can see a thick cell wall which gives them structure and protection. The cell wall does NOT however control what enters and leaves the cell.
