## Reforestation In The R Lic

Historically, reforestation has been a strong long-term investment for landowners. This publication assesses the pine reforestation investment based on current stumpage prices and associated costs to determine whether it still offers attractive returns. We review potential returns from typical pine plantations in the U.S. South.

## Is Reforestation a Profitable Investment? An Economic ...

The basic idea in reforestation is straightforward: plant trees and other long-lasting plants in order to take up and store carbon from the atmosphere. Development of mechanisms to plant trees in large enough scale and short enough time frame to be useful in ameliorating climate change is the difficult part.

Biodiversity is an essential component of reforestation. As we said, reforestation isn't as simple as planting more trees. The trees have to be the right kind, and you can't plant a single species of tree in an area and call it a day. Forests will naturally have a lot of biodiversity - both in plants and in animals.

Reforestation is required as part of the federal forest law. 31% of Germany is forested, according to the second forest inventory of 2001–2003. The size of the forest area in Germany increased between the first and the second forest inventory due to forestation of degenerated bogs and agricultural areas.
